FOR

**PRISM ENERGY SERVICES MINIMIZING NEW ENGLAND'S CARBON FOOTPRINT:**

Prism Gains Contract with PSNH, Bringing Energy Efficiency Services to NH Territories

**December 16, 2009--Quincy, MA:** A carbon footprint is the measure of impact on the environment caused by burning fossil fuels for electricity, heating and transportation.\* The worldwide goal of reducing carbon emissions has been an ongoing struggle, but is an achievable goal!

For over 10 years, Prism Energy Services has been working in collaboration with utility providers throughout New England to minimize the carbon footprint of facilities throughout Massachusetts. This reduction in carbon emissions is achieved through design and installation of personalized energy efficiency measures and energy alternative solutions. Prism takes pride in these measures, which help keep our earth green, while saving customers up to 30% on monthly energy bills.

Starting in 2010, Prism Energy Services will be partnering with Public Service of New Hampshire (PSNH) to bring these energy efficiency measures to facilities throughout NH. PSNH will be offering incentive programs to assist interested facilities in paying for energy efficiency upgrades installed by Prism Energy Services.

For more information on making your facility more energy efficient, visit the Prism Energy Services website at [www.prismenergyservices.com](http://www.prismenergyservices.com).
